

How Does The Healing Collar Work?

A team of dedicated scientists and researchers have developed a formula using several different minerals. This special combination reacts together to produce substantial results for more effective energy production and healing.

Copper

Helps to reduce joint pain. It increases the functions of a number of antioxidant enzymes. It helps with the creation of collagen, which is a core protein in the bones, connective tissue, skin and joints. Helps to alleviate arthritis symptoms such as inflammation and pain.

Azurite

It is a useful mineral that can aid with health issues such as migraines, tinnitus and inner ear issues causing vertigo. It is said to help clear toxins from the body, through its action to heal the liver, kidneys and gallbladder. Also, helps shorten the healing time of fractured bones.

Fluorite

Is known to strengthen bones and teeth and lessen the pain from arthritis. It is also used to enhance mental functions by balancing the chemistry in the brain. Cells throughout the body are invigorated and the immune function is enhanced.

Tourmaline

Has the ability to create balance within the body through a generation of negative ions and iron which strengthens the immune system. It also is able to self-produce an electrical charge which stimulates the reflex points associated with the lower back, legs, ankles and feet. It provides pain relief and assists with strained or torn muscles, numbness, arthritis, and scar tissue.

26" Healing Pet Collar™

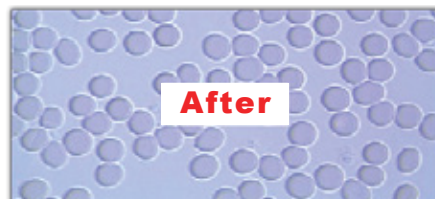

(can be cut to size)

- Who Should Wear This Collar?**
Any of your loved pets; dogs, cats, farm animals and pets of all kinds. Should be worn by pets of all ages.
- What Is The Healing Collar?**
Our collars are infused with minerals proven to help with inflammation and pain due to arthritis, joint pain, low energy and stress. In some cases it completely eliminates the pain.
- When Should The Collar Be Worn?**
The collar should be worn every day to benefit your pet. This is not a cure but it helps as long as the collar is worn.
- Why Should Your Pet Wear This?**
Everyone knows it is heartbreaking to see your pet in pain, unable to jump up on the couch or even walk. Reducing or eliminating the pain will help your pet recover the mobility they once had.
- M4PH researchers found that when the healing collar comes in contact with the body, an immediate reaction occurs.** More oxygen is deposited in the red blood cells. This change allows more oxygen to be transported through the body. When blood is able to circulate more freely, physical overall health improves.
- Blood tests were performed,** over a five year period, before and after wearing the collar. Over 250 live blood tests showed 100% positive results. The results on all tests showed a significant change in the blood cells when the collar is worn.

26" Healing Pet Collar™

How to fit it on your pet

Step 1

Attach the collar around the neck and thread it through the buckle.

Step 2

Place one finger between the collar and the neck pulling the collar through the buckle until it is firm against your finger.

Step 3

Use scissors to cut the excess off leaving about 1-1/2" extending beyond the buckle.

#2538 Grey Paws Collar

#2545 Pink Paws Collar

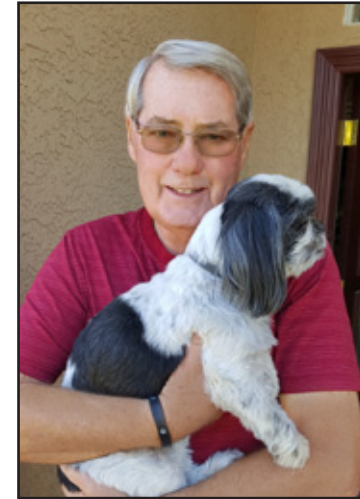

#2552 Silver Butterfly Buckle

#2569 Black Butterfly Buckle

🐾 Testimonies

"Boomer is a 15 year old Shih Tzu. He walked for several years with a limp and was unable to jump up on anything. After placing a collar on Boomer, the next morning there was no sign of a limp and he was acting like he was many years younger. No more stairs needed to get up on the bed. He can jump up all by himself."
- Roger

The healing benefits work on people also. Both Roger and Boomer benefit from this amazing product. Make a band for yourself with a butterfly clip.

Make A Band For Yourself Too!

How to attach a butterfly clip (sold separately)

Step 1 - Open clip and lay upside down.

Step 2 - Insert strap corner first at an angle with paw prints down. (upside down)

Step 3 - Be sure the strap is straight and leave a tiny space between the end of the strap and the back wall of the clip or it won't close easily.

Step 4 - Push down the clasp, with the teeth, until you hear a click. If you need to open it to readjust, place a pointy object in the hole to pry it open.

Step 5 - Close both ends of the clip.

Step 6 - Place on your wrist and mark the strap in the middle of the first clip.

Step 7 - Cut the marked strap with scissors and repeat previous steps to attach the other end.
